Halter- A class where horses are shown "in hand," meaning that they are led, not ridden, and are judged on their conformation and suitability as breeding stock.

Showmanship- A Showmanship class will be judged on the exhibitor's ability to fit and show the horse at halter, the horse is merely a prop to show the ability and preparation of the exhibitor.

Equitation/Horsemanship- Equitation is the skill of the rider, using the correct form and aids (hands, legs, seat, weight, and voice) to produce the maximum performance of the horse. This includes stock seat (western), hunt seat (english), saddle seat, and reinsmanship (driving).

Pleasure- The emphasis in judging is on the horse. Class is to be judged on the horse's manners, performance and suitability of the horse as a pleasure mount. This includes western, hunter under saddle (english), saddle seat, and pleasure driving.

Trail- A class where horses and riders navigate a series of obstacles that are designed to resemble situations a horse and rider might actually encounter when on a trail in a natural habitat. Contestants ride the course one at a time.

**If a rider does not complete an obstacle, they will get a 0 for that element.

Trail In Hand- A class where horses and exhibitors navigate a series of obstacles that are designed to resemble situations a horse and exhibitor might actually encounter when on a trail in a natural habitat. Contestants complete the course one at a time.

**If a rider does not complete an obstacle, they will get a 0 for that element.

Hunter- The Dressage classes consist of an exact sequence of movements ridden in an enclosed arena.

Jumping tests, the technical jumping skills of the horse and rider, including suppleness, obedience, fitness and athleticism.

**Jumping – Type of class will be based off of number of riders entered in the event.

**Option 1: Will run as an equitation over fences class with 2 jumps

**Option 2: Will have 6-8 jumps. Ride as a jumper style class. Points are assigned to each jump and the goal is to get the most points. Time starts when rider takes their first jump. No jump may be ridden twice in a row. Knocking down a jump results in zero points on that jump and the jump is no longer available for your remaining time.

**Option 3: exhibitor and superintendent choice (to be discussed among exhibitors and superintendent)

**Entries in the jumping classes must be pre-approved every year.

A riders - Fences will be 2' to 2'5"- must be pre-approved at fair with a two jump test

B riders - Fences will be under 2' - must be pre-approved at fair with a two jump test

This is a summary of animal health requirements for fairs, shows and exhibitions. They are not necessarily the same as requirements for importing animals into Wisconsin or moving them within the state for other purposes. They may change if animal diseases occur in Wisconsin or elsewhere, so always check datcp.wi.gov or contact us for current information. Fairs or exhibitions may have additional requirements. Exhibitors should contact the event organizers for more information. Ref. s. ATCP 10.87, Wis. Admin. Code.

General requirements for event organizers
All fairs or exhibitions of any length must obtain, review, and keep for five years all required records and test results:
• Exhibitor's name and address
• Animal identification (number, type, description, and, when required, official identification (see requirements f
or different animals below)
• Documents showing compliance with disease testing and other health requirements
• Livestock premises number, if any, where animals originated
• Documentation showing legal importation to the event (if applicable) and, when required, movement to the event (see requirements for different animals below)
• For swine, a record of any swine transported directly to a slaughtering establishment
• For swine, a record of any swine transported to an animal market where all animals sold at the market sale for that day were shipped directly to a slaughtering establishment Fairs or exhibitions lasting more than 24 hours must appoint a licensed veterinarian to inspect all animals daily.
Note: Except in specific circumstances, if an animal already bears an official 840 eartag, that eartag must not be removed and additional official eartags must not be applied. Instead, the existing eartag must be read 8 and recorded when a record of that animal is required. (Ref. s. ATCP10.045, Wis. Admin. Code)
These regulations apply to all fairs and exhibitions, including additional events (like rodeos, shows, or other organized events) that occur in conjunction with the fair.

Animals that show evidence of having contagious or infectious diseases may not be commingled (or housed/kept) with other animals at a fair, show, or other exhibition in such a way as to allow disease to spread. Such animals should not attend the fair, show, or exhibition. Animals may be denied entry if they arrive at these events with contagious or infectious diseases, isolated and/or removed if they develop disease after arriving, or be subject to other action as would be necessary to control disease. (Ref. s. ATCP 10.08(1), Wis. Admin. Code) **Bovine animals with ringworm, mange, warts or scab** will be removed from the fair or exhibition premises, unless the veterinarian in charge finds warts or ringworm lesions are incapable of transmitting disease. dah-adc-139 (1/2023)

Swine
Note: These regulations apply to all swine, including pet pigs and racing pigs. Note: Herd of origin means the herd in which the pigs currently reside, likely the exhibitor's herd. When pigs are purchased from a herd, the herd from which they originate is the herd of origin for the seller. Once the purchased pigs are added into the buyer's herd (even if the buyer's herd only consists of one or just a few animals), the buyer's herd becomes the new herd of origin and that herd must meet testing requirements to move pigs again.
Swine FROM WITHIN WISCONSIN (Ref. s. ATCP 10.32(2) and 10.87, Wis. Admin. Code) need a Wisconsin intrastate certificate of veterinary inspection (CVI or health certificate) : • Stating that the entire herd of origin on the farm was inspected within 30 days before the show and no apparent disease was present at the time of

1

inspection .

 • **Non-terminal Exhibitions**: All swine must have a PRRS (Porcine Reproductive and Respiratory Syndrome) and PEDv (Porcine Epidemic Diarrhea virus) test of the herd of origin within 90 days of the end of the exhibition. Include test date, type, and results on the CVI.

• **Terminal Exhibitions**: No testing requirements. Note: Terminal Exhibitions are those at which all the swine go directly from the fair/show to the slaughtering establishment OR to a slaughter only market sale. Shows or exhibitions are either terminal or non-terminal. If all of the pigs at the event are not going directly to slaughter (including through a slaughter only market sale), it is considered a non-terminal exhibition. For non-terminal exhibitions, all the pigs at the show or exhibition will need to be tested prior to the event even if individual animals will go directly to slaughter. If going to a slaughter only market sale, contact the Division of Animal Health fair inspector for required information to collect. Note: If the fair intends to use a load-out facility, contact the Division of Animal Health in advance to discuss requirements that must be met.

Swine FROM OUTSIDE WISCONSIN (Ref. s. ATCP 10.30 and 10.87, Wis. Admin. Code) need a certificate of veterinary inspection (CVI or health certificate)a that includes the following:

• The negative results of the PEDv testc from the swine's herd of origin conducted within 90 days prior to movement into Wisconsin including test date, type, and results. • A statement that the veterinarian has inspected the entire herd of origin within the past 30 days and that no clinical signs of PRRS and PEDv or any other apparent disease was present at the time of inspection. d • Official individual identification (ID) b Acceptable methods of ID for swine are:

• USDA silver ear tag • USDA 840 ear tag, either visual or RFID

• Breed association tattoo if the pig is a purebred and the tattoo is registered

 • An ear tag with the premises identification number and a unique identifier

• Ear notch if the pig is a purebred and the notch is registered

Note: Microchips are not accepted as official ID for any swine including pet pigs. Requirements are subject to change as conditions warrant. For current information and for PRRS and PEDv testing options, check https://datcp.wi.gov/Pages/Programs_Services/SwineM ovement.aspx.
